

# CyNethra Pro Intelligence & Forensic Suite

Official Field Investigation Handbook & 50+ Tools Operating Guide (English)

 **CONFIDENTIAL • STRICTLY RESTRICTED TO LAW ENFORCEMENT & CYBER CELLS**

CyNethra is India's premier automated forensic intelligence and OSINT investigation platform built exclusively for Police, Cyber Crime Cells, and Intelligence Agencies. Interfaced with 1.78 Billion telecom records, 66+ Million Cell Tower masts, MoRTH Vahan databases, and military-grade digital tracking mechanisms.

## 1. Telecom & Mobile OSINT Intelligence

| Module / Capability                  | Command Syntax                          | Operational Description & Output                                                                                                                  |
|--------------------------------------|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 10-Digit Mobile Direct               | <code>9848022338</code>                 | Queries 1.78B record database for subscriber registered name, full residential address, circle, and operator. Generates instant Case Dossier PDF. |
| <code>/osint</code>                  | <code>/osint 9848022338</code>          | Retrieves CAF telecom registration, indexed social media handles, email cross-links, and alternate contacts.                                      |
| <code>/true</code>                   | <code>/true 9848022338</code>           | Crowdsourced caller directory lookup, spam probability score, and community tags.                                                                 |
| <code>/carrier</code>                | <code>/carrier 9848022338</code>        | Live network carrier (Airtel/Jio/VI/BSNL), telecom circle, and Mobile Number Portability (MNP) routing status.                                    |
| <code>/hlr</code>                    | <code>/hlr 9848022338</code>            | Real-time Home Location Register ping to determine if SIM is online, switched off, roaming circle, and IMSI prefix.                               |
| <code>/names</code>                  | <code>/names Ramesh Kumar Guntur</code> | Correlates suspect name and city/jurisdiction to unearth all associated phone numbers.                                                            |
| <code>/imei &lt;15-digits&gt;</code> | <code>/imei 867543048912345</code>      | Decodes brand, model, commercial name, TAC allocation, and radio bands.                                                                           |
| <code>/vn</code>                     | <code>/vn +918001234567</code>          | Detects if a number is a standard GSM carrier or a virtual VoIP/cloud PBX number (Twilio, Skype, etc.).                                           |

## 2. Cell Tower BTS & Nodal LBS Triangulation

| Module / Capability           | Command Syntax                                  | Operational Description & Output                                                                                            |
|-------------------------------|-------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| LBS SMS Direct Parser         | <code>Paste raw Nodal SMS</code>                | Automatically parses MCC, MNC, LAC, Cell ID, Azimuth, and distance from telecom nodal SMS. Renders map link & beam azimuth. |
| <code>/tower</code>           | <code>/tower 404070228304778</code>             | Pinpoints exact tower mast GPS coordinates, site address, and antenna bearing from 66M mast database.                       |
| <code>/triangulate ...</code> | <code>/triangulate 1042:22101 1042:22102</code> | Calculates overlapping signal zones from 3 adjacent cell towers to estimate suspect presence area.                          |

## 3. Digital HoneyTrap & Satellite GPS Tracker

| Module / Capability                                                                                                          | Command Syntax                                      | Operational Description & Output                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <code>/trap [url]</code>                                                                                                     | <code>/trap Case_104_AP https://youtu.be/xyz</code> | Generates an encrypted video/notice decoy link and QR code. When opened by suspect, secures satellite GPS lock ( $\pm 5m$ precision) directly to bot. |
|  <b>Confirm Identity (Selfie Capture)</b> | <code>Citizen verification button</code>            | Client-side compressed selfie verification uploads suspect face photo and device hardware specs (GPU, RAM, Cores, Screen) immediately.                |
| <code>/traplist</code>                                                                                                       | <code>/traplist</code>                              | Displays all active honeytraps created by the officer and total recorded visits/hits.                                                                 |
| <code>/traphits</code>                                                                                                       | <code>/traphits tr_d80b7f7531</code>                | Full forensic dossier of all visitors on a trap (IP, ISP, OS, browser, GPS coordinates, timestamps).                                                  |
| <code>/stoptrap</code>                                                                                                       | <code>/stoptrap all</code>                          | Immediately stops alerts and deactivates tracking links so no further unwanted alerts arrive.                                                         |

## 4. Vehicle RC & Transport Forensics

| Module / Capability   | Command Syntax                   | Operational Description & Output                                                                            |
|-----------------------|----------------------------------|-------------------------------------------------------------------------------------------------------------|
| <code>/rc</code>      | <code>/rc AP39AB1234</code>      | MoRTH Vahan dossier: Owner name, registration date, hypothecation bank, insurance validity, and PUC status. |
| <code>/challan</code> | <code>/challan AP39AB1234</code> | Pending traffic challans, violation location, photographic evidence, and virtual court status.              |

| Module / Capability    | Command Syntax                      | Operational Description & Output                                                               |
|------------------------|-------------------------------------|------------------------------------------------------------------------------------------------|
| <code>/crc</code>      | <code>/crc MD625AZ12H1234567</code> | Retrieves vehicle registration number and complete RC dossier from chassis number.             |
| <code>/erc</code>      | <code>/erc DH12345678</code>        | Resolves engine number to owner identity and vehicle RC records.                               |
| <code>/ftag</code>     | <code>/ftag AP39AB1234</code>       | FASTag NPCI Tag ID, issuing bank, wallet status, and active balance.                           |
| <code>/ftagtoll</code> | <code>/ftagtoll AP39AB1234</code>   | Toll plaza passage chronology, timestamped highway transit history for suspect route tracking. |

## 5. Legal Summons & Forensic PDF Tracking

| Module / Capability                      | Command Syntax                                 | Operational Description & Output                                                                                     |
|------------------------------------------|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <code>/trackpdf [name]</code>            | <code>/trackpdf Crime_104_AP Ramesh</code>     | Drafts an official Section 91 Cr.P.C. / Sec 94 BNSS summons PDF weaponized with a silent tracking beacon.            |
| <code>/ipc</code><br>& <code>/bns</code> | <code>/ipc 420</code> or <code>/bns 318</code> | IPC to Bharatiya Nyaya Sanhita (BNS 2023) concordance, legal definitions, and bailable/non-bailable classifications. |

## 6. Cyber Crime, Dark Web & Banking

| Module / Capability   | Command Syntax                     | Operational Description & Output                                                                     |
|-----------------------|------------------------------------|------------------------------------------------------------------------------------------------------|
| <code>/ip</code>      | <code>/ip 103.211.201.5</code>     | Public IP intelligence: ISP, organization, VPN/Proxy/Tor exit node classification, and threat score. |
| <code>/domain</code>  | <code>/domain fraudsite.com</code> | Resolves registrar, nameservers, historical IP resolutions, and SSL certificate validity.            |
| <code>/leak</code>    | <code>/leak 9848022338</code>      | Audits compromised passwords and credentials exposed in major international dark web data breaches.  |
| <code>/leak360</code> | <code>/leak360 9848022338</code>   | Comprehensive 360° deep web exposure analysis across corporate and public breaches.                  |
| <code>/ifsc</code>    | <code>/ifsc SBIN0001234</code>     | RBI bank branch lookup: Branch name, address, MICR, and RTGS/NEFT/IMPS clearing codes.               |
| <code>/pan</code>     | <code>/pan ABCDE1234F</code>       | Validates PAN format, issuing category (Individual/Company/Trust), and IT department validity.       |
| <code>/gst</code>     | <code>/gst 37ABCDE1234F1Z5</code>  | GSTIN status, taxpayer trade name, legal name, and registration jurisdiction.                        |

| Module / Capability           | Command Syntax               | Operational Description & Output                                                                 |
|-------------------------------|------------------------------|--------------------------------------------------------------------------------------------------|
| <b>/pnr &lt;10-digits&gt;</b> | <code>/pnr 4521234567</code> | Indian Railways PNR transit details: Train number, stations, coach, and berth allocation status. |
| <b>/pin</b>                   | <code>/pin 520001</code>     | India Post postal circle directory and delivery post office hierarchy.                           |

## 7. Bulk Investigation & Administration

| Module / Capability | Command Syntax                             | Operational Description & Output                                                            |
|---------------------|--------------------------------------------|---------------------------------------------------------------------------------------------|
| <b>/bulkosint</b>   | <code>/bulkosint 9848011111 ...</code>     | Batch queries up to 20 mobile numbers simultaneously for rapid field screening.             |
| <b>/bulknames</b>   | <code>/bulknames 9848011111 ...</code>     | Batch extracts caller directory identities across multiple numbers.                         |
| <b>/bulkrc</b>      | <code>/bulkrc AP39AB1234 ...</code>        | Multi-vehicle registration ownership check in a single batch.                               |
| <b>/bulkimei</b>    | <code>/bulkimei 867543048912345 ...</code> | Multi-handset TAC specifications and radio band decoding.                                   |
| <b>/bulkcgi</b>     | <code>/bulkcgi 404070228304778 ...</code>  | Batch converts raw cell IDs to GPS coordinates and addresses.                               |
| <b>/lang</b>        | <code>/lang</code>                         | Opens interactive language selector (English, Telugu, Hindi, Kannada, Tamil, Malayalam).    |
| <b>/referral</b>    | <code>/referral</code>                     | Generates personal officer referral invite link (+20 free searches per verified colleague). |
| <b>/plans</b>       | <code>/plans</code>                        | Displays 30-day investigation pass (₹399/mo) and token pack recharge QR codes.              |
